Dear Jenna Betten,

I am writing to express my interest in the Software Engineer Intern/Co-Op position at Meta that was posted on Indeed. As a first-year Computer Science major at The City College of New York, I am eager to gain practical experience in the field and contribute to your team's projects. I should be hired for this position because I want to help Meta with their goal of giving "people the power to build community and bring the world closer together.", by using all of the hard and soft skills I have acquired over the years.

My coursework and my previous internship have provided me with a strong foundation in programming languages such as Java and Python, as well as a solid understanding of data structures and algorithms. Additionally, I have experience working on group projects, which has honed my communication and teamwork skills.  In addition, my previous work experiences and volunteer work helped me manage my time and work efficiently.

I am excited about the opportunity to apply my skills and knowledge to real-world projects at Meta. I am confident that my passion for technology, willingness to learn, and attention to detail make me a strong fit for the position.

Thank you for considering my application. I look forward to discussing my qualifications further in an interview.

Sincerely,
Abdul Ashaif
